

Public Open House Held for Russian River County Sanitation District Wastewater Treatment Plant Irrigation Reliability and Beneficial Reuse Project

Members of the public gather in the Guerneville Public Library as Cordel Stillman answers their questions.

On February 22 approximately thirty five members of the public attended a public open house hosted by the Agency at the Guerneville Public Library on behalf of the Russian River County Sanitation District. The open house was organized by the Agency for the public to discuss the Russian River County Sanitation District Wastewater Treatment Plant Irrigation Reliability and Beneficial Reuse Project. The open house was successful due to the fact that members of the public were able to obtain project information, ask questions and meet face-to-face with Agency staff.

The Proposed Project would provide a flexible and reliable recycled water distribution system serving water users in the Russian River Valley and Green Valley areas. The Proposed Project would consist of the construction, operation, and maintenance of recycled water pipelines; booster pump stations; storage tanks; and associated appurtenances.

For more information about the open house, please contact Brad Sherwood at Sherwood@scwa.ca.gov. For more information about the Proposed Project visit <http://www.scwa.ca.gov/projects/>.
